

Lightest 500GB

Lightest 2.5-inch external drive with a capacity of half terabyte (500GB) already available in stores. The device is manufactured by Verbatim as handy pda (light, small and thin), but has a capacity of a notebook from the top shelf. It weighs less than 170 grams and is available at a price 820 USD (suggested retail price).

Users now attach great importance to simple handling, mobility, and - increasingly - the appearance of your data media, which must at the same time characterized by a high capacity. Miroshnik kai, head of media and peripherals for Europe, Middle East and Africa said: "Another time, as one of the first to introduce an innovative solution to market. Our 2.5-inch disk with a half terabyte capacity is probably the lightest in the world. This achievement is particularly important for us, because only less than a year ago we entered the market for external hard drives. Housed in a hand is characterized by a huge disk capacity by using it three platters with a capacity of 166GB each. This allows you to store enormous amounts of data that can be easily and quickly move from the desktop or laptop computer. USB port enables data transfer at speeds up to 480 Mbit / second. Version also has a combo Firewire connector through which you can transfer data at speeds up to 400 Mbit / second. Drive is powered directly from USB 2.0 and requires no external power supply or additional USB cable. The device is also very quiet because it operates without a fan. All Verbatim hard drives are equipped with user-friendly software for backup. Leopard operating system from Apple program that is Time Machine, and models with USB interface software used Nero - BackItUp 2 Essentials. The new 2.5-inch hard drive Verbatim 500GB capacity is available for sale since June, and its price is 820 USD gross price (suggested retail price).
