

Intel Reader - reads books Cloud

Intel introduced a new handheld gadget, help in reading books. The device has received a "Reader" and may be useful to many people, such as having a problem with vision or suffering from dyslexia.

Intel Reader is equipped with Intel Atom processor and has a high quality built-in camera. It is used for taking pictures of text that is automatically converted to digital form. Obtained in this way materials can be presented on the 4.3-inch color screen (you can choose different font sizes). Additionally, thanks speech text can be read by a voice teacher. The device allows the operation of electronic books stored in the DAISY format (Digital Accessible Information System). Thus, it is possible to simultaneously listen to the contents of books and tracking them on the screen. In addition, Intel Reader allows playback of MP3 and WAV files.
